

Ultimate Leap Dance Center

Safety Precautions 2020-21

Following these safety precautions will help keep everyone healthy and prevent the spread of COVID-19.

- Please do not arrive more than 5 minutes before the start of your class.
- Enter the studio through the front doors under the purple awning.
- Parents are not welcome to stay in the lobby during class. You may come in with your dancer if needed, but you will need to wait outside after dropping them off.
- Sanitize upon arrival at the front desk.
- Per Dane County Government Officials, all persons age five and over who enter indoor facilities should be wearing a mask. If you have a medical condition that prevents you from wearing a mask, you are exempt from this order. Others cannot legally ask about your medical condition. Therefore, if we see you without a mask on, we will assume you have a medical condition.
- Place your coat and street shoes on the side of the lobby of the studio where you will be taking class. Only bring your dance shoes (for all classes) into the studio.
- Please wait in the lobby for your class to start, not the dressing room.
- The dressing room should only be used for going to the bathroom or washing your hands.
- Please line up to enter class. The new class will be welcomed into the studio, and the finished lined up class will be released to put on their outside clothing and exit through the front doors.
- While in class, please be respectful of others and do your best to social distance.
- Dancers will exit out the front doors under the purple awning
- Parents please be on time to pick up your dancer to minimize time spent in the lobby.
- Dancers should sanitize before leaving the studio.

ULDC is working to have classes remain in-person throughout the year. While we follow the DeForest School District for weather cancellations, we do not need to follow their decisions for COVID-19.

Here are some things that ULDC has put in place to help us remain open:

- We are keeping classes small.
- Staff will sanitize the floors and ballet barres between age groups.
- We have purchased Norwex Mops, which are to pick up 99.9% of germs.
- We have purchased air purifiers with ultraviolet light to kill germs in the air in each studio.
- High traffic areas will be cleaned daily.
- We will provide hand sanitizer on the way in and the way out.
